PROFESSIONAL SUMMARY

Final-year Computer Science student with two completed internships — Software Developer at PenguinApps Lab (Mumbai) where I shipped a full-stack Task Manager (Django + React + PostgreSQL + Docker) and contributed UI/UX work to a live client product; and an AI/ML intern at Infosys Springboard, delivering a production-ready regulatory compliance checker using Python and NLP. Comfortable across the full stack — from REST API design to responsive frontends — with hands-on experience in professional dev workflows: Git branching, Docker, and code review in fast-paced startup teams.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), Java, C
Web	HTML5, CSS3, JavaScript (ES6+), React, Django REST Framework, Responsive Design
AI / ML	Supervised Learning, NLP, Generative AI, Model Training & Evaluation, Data Preprocessing
Tools	Git & GitHub, Docker, Docker Compose, PostgreSQL, Jupyter Notebook, VS Code, Spyder IDE
Platforms	Linux, Windows

EXPERIENCE

Software Developer Intern

May 2026 – Jul 2026

PenguinApps Lab · Remote · Mumbai

- Built a full-stack Task Manager app with a Django REST API backend (Python), React frontend, and PostgreSQL database — containerised with Docker Compose for consistent dev/prod environments
- Implemented JWT-based auth (register/login), project and task CRUD endpoints, and PATCH-based status updates; CORS-configured for seamless frontend-backend communication
- Contributed to a live client-facing web product — designed and implemented UI/UX for key authentication pages, working on a dedicated Git branch with full PR and code-review workflow
- Followed professional engineering practices: Git branching strategy, environment variable management, and team collaboration on a shared production codebase

AI/ML Virtual Intern

Sept 2025 – Nov 2025

Infosys Springboard · Remote

- Designed and deployed an AI-driven contract analysis system that automatically checks documents for compliance with GDPR, HIPAA, CCPA, and SOX regulatory standards
- Built a risk assessment engine in Python that classifies non-compliant clauses into Low / Medium / High severity levels, reducing manual review effort
- Applied supervised learning, NLP pipelines, and model evaluation techniques across the full ML lifecycle — from data preprocessing to inference
- Delivered the project within a structured internship timeline, producing clean, documented, and reproducible code

Student Lead Coordinator

Aug 2024 – Present

Institution's Innovation Council (IIC) · MRCE, Hyderabad

- Spearheaded planning and execution of innovation, entrepreneurship, and technical events across the institution
- Strengthened event management, team coordination, and stakeholder communication abilities

PROJECTS

Task Manager — Full-Stack Web App

2026

PenguinApps Lab Internship Project · Django · React · PostgreSQL · Docker

github.com/coder-adi6/task-manager

- Designed and built a full-stack task management application with a Django REST Framework backend, React (CDN) frontend, and PostgreSQL database — fully containerised with Docker Compose
- Implemented user authentication (register/login with token), project management, task CRUD, and status update (PATCH) endpoints; CORS-enabled for frontend integration
- Automated environment setup with a Jupyter Notebook script; falls back gracefully to SQLite if PostgreSQL is not configured, ensuring zero-friction local development

AI-Powered Regulatory Compliance Checker

2025

Infosys Springboard — Internship Project · Python · NLP · Supervised Learning

github.com/coder-adi6/AI-Powered-Regulatory-Compliance-Checker-for-Contracts

- Built an end-to-end AI system that parses legal contracts and flags clauses violating GDPR, HIPAA, CCPA, and SOX regulations
- Implemented severity scoring (Low / Medium / High) using supervised classification; evaluated model performance with standard ML metrics
- Produced well-documented source code hosted on GitHub; project selected as an internship capstone deliverable

EDUCATION

B.Tech — Computer Science & Engineering

2023 – 2027

Malla Reddy College of Engineering (MRCE)

Affiliated to JNTU Hyderabad · Expected 2027

Intermediate — Science (PCM)

2021 – 2023

Sree Navodaya Junior College

CERTIFICATIONS & TRAINING

AI & ML: AI Fundamentals · Deep Learning · NLP & Generative AI

Data Science: Data Science · Computer Vision · Python & Data Analytics

Development: Full Stack Web Development · Microsoft Mastering GitHub

Professional: Time Management · High-Impact Presentations · Email Writing
