PROFESSIONAL SUMMARY

Final-year Computer Science student with internship experience — Software Development Engineer (SDE) at PenguinApps Lab (Mumbai) where I shipped a full-stack Task Manager (Django + React + PostgreSQL + Docker) and currently contributing to a live client product; and an AI/ML intern at Infosys Springboard, delivering a production-ready regulatory compliance checker using Python and NLP. Comfortable across the full stack — from REST API design to responsive frontends — with hands-on experience in professional dev workflows: Git branching, Docker, and code review in fast-paced startup teams.

TECHNICAL SKILLS

Languages : Python, JavaScript, Java, C

Web : HTML5, CSS3, JavaScript (ES6+), React, Django REST Framework, Responsive Design

Tools : Git & GitHub, Docker, PostgreSQL, Jupyter Notebook, VS Code, Spyder IDE, Google Colab

EXPERIENCE

Software Developer Intern

May 2026 – Present

PenguinApps Lab · Remote · Mumbai

- Built a full-stack Task Manager app with a Django REST API backend (Python), React frontend, and PostgreSQL database - containerised with Docker Compose for consistent dev/prod environments.
- Contributed to a live client-facing web product — designed and implemented UI/UX for key authentication pages, working on a dedicated Git branch with full PR and code review workflow.

AI/ML Virtual Intern

Sept 2025 – Nov 2025

Infosys Springboard · Remote

- Designed and deployed an AI-driven contract analysis system that automatically checks documents for compliance with GDPR, HIPAA, CCPA and SOX regulatory standards.
- Built a risk assessment engine in Python that classifies non-compliant clauses into Low / Medium / High severity levels, reducing manual review effort.

PROJECTS

Task Manager — Full-Stack Web App [LIVE LINK](#)

2026

PenguinApp Labs Internship Project · Django · React · PostgreSQL · Docker

- Designed and built a full-stack task management application with a Django REST Framework backend, React (CDN) frontend and PostgreSQL database fully containerised with Docker Compose.
- Implemented user authentication (register/login with token), project management, task CRUD, and status update (PATCH) endpoints; CORS-enabled for frontend integration.

AI-Powered Regulatory Compliance Checker [LIVE LINK](#)

2025

Infosys Internship Project · Python · NLP · Supervised Learning

- Built an end-to-end AI system that parses legal contracts and flags clauses violating GDPR, HIPAA, CCPA, and SOX regulations.
- Implemented severity scoring (Low / Medium / High) using supervised classification; evaluated model performance with standard ML metrics.

EDUCATION

B.Tech — Computer Science & Engineering

2023 – 2027

Malla Reddy College of Engineering (MRCE)

Affiliated to JNTU Hyderabad

Intermediate — Science (PCM)

2021 – 2023

Sree Navodaya Junior College

CERTIFICATIONS & TRAINING

AI & ML : AI Fundamentals · Deep Learning · NLP & Generative AI

Data Science : Data Science · Computer Vision · Python & Data Analytics

Development : Full Stack Web Development · Microsoft Mastering GitHub

Professional : Time Management · High-Impact Presentations · Email Writing
